Review Math 131 Midterm #1 Spring 2011

For the midterm:

— you should review your homework problems and the activities done in class. At least one problem will be taken from the activities done in group work.

— 40% will be allocated for "unknown angle problems". Good practice problems can be found in New Elementary Mathematics p.240-242, p.250-251, p.264-266, and p.274-275 #1-11.

— you should know how to do the constructions 1, 2, 3, and 4 p.51-52 of your textbook.

— you should be able to solve the problems from previous exams provided in class.

— make sure to have a compass, protractor, and straightedge.

The midterm will be in class Wednesday, February 23.
