

Nan Chen

✉ chennan@math.wisc.edu • 🌐 www.math.wisc.edu/~nchen29

(Last updated on 2023/8/31)

Current Position

Assistant Professor 2018/08–
Department of Mathematics, University of Wisconsin-Madison,
Faculty Affiliate 2020/08–
Institute for Foundations of Data Science, University of Wisconsin-Madison,

Education

Ph.D. in Mathematics/Atmosphere and Ocean Science 2011/09–2016/05
Courant Institute of Mathematical Sciences, New York University,
Thesis Advisor - Professor Andrew. J. Majda
M.S. in Computational Mathematics 2007/09–2011/06
The School of Mathematical Sciences, Fudan University,
Thesis Advisor - Professor Jin Cheng and Professor Xiaoming Wang
B.S. in Theoretical and Applied Mechanics 2004/09–2007/06
Department of Mechanics and Engineering Science, Fudan University,

Previous Appointments

POSTDOC RESEARCH ASSOCIATE 2016/06–2018/05
Courant Institute of Mathematical Sciences, New York University,
Mentor - Professor Andrew J. Majda
GRADUATE RESEARCH ASSISTANT 2011/09–2016/05
Courant Institute of Mathematical Sciences, New York University
Thesis Advisor - Professor Andrew J. Majda
VISITING SCHOLAR 2008/09–2009/08
Department of Scientific Computing, Florida State University
Host - Professor Max Gunzburger and Professor Xiaoming Wang

Research Interests

Modeling, Analyzing, and Predicting Complex Systems
Uncertainty Quantification and Prediction, Stochastic Dynamical and Statistical Models
Machine Learning, Information Theory, Data Assimilation, Lagrangian Tracers
Madden-Julian Oscillation, Monsoon, El Niño Southern Oscillation, Sea Ice
Data-Driven Methods, High Dimensional Statistical and Data Analysis
Multiscale Analysis, Fluids and Geophysical Flows, Inverse Problems

Academic Services

1. Conference and Workshop Organizers:

16. **Minisymposium co-organizer at 16th WCCM** 2024/07
Hybrid techniques in data-driven modeling, forecasting, and UQ
Co-organizer: Di Qi (Purdue University) Mustafa Mohamad (U. Calgary). July 21–26, 2024, Vancouver, Canada
15. **Minisymposium co-organizer at SIAM UQ** 2024/02
Statistical and Data-Assisted Modeling Approaches for Forecasting and UQ
Co-organizer: Di Qi (Purdue University) Mustafa Mohamad (U. Calgary). February 27–March 1, 2024, Trieste, Italy
14. **Special session co-organizer at AGU 2023** 2023/12
Advances in Computational Analysis in Geophysical Processes
Co-organizer: Reza Malek-Madani (USNA), and Di Qi (Purdue University). December 11–15, 2023, San Francisco, CA
13. **Minisymposium co-organizer at ICIAM 2023** 2023/08
Combining ML and Stochastic Methods for Modeling and Forecasting Complex Systems
Co-organizer: Di Qi (Purdue University). August 20–25, 2023, Tokyo, Japan
12. **Minisymposium co-organizer at SIAM MPE** 2022/07
New advances in developing subgrid-scale closures and reducing model errors
Co-organizer: Pedram Hassanzadeh (Rice U) and Reza Malek-Madani (USNA). July 13–15, 2022, Pittsburgh, PA
11. **Minisymposium co-organizer at SIAM UQ** 2022/04
Information Theory, Data Assimilation and Stochastic Models for Multiscale Nonlinear Systems
Co-organizer: Honghu Liu (Virginia Tech). April 12–15, 2022, Atlanta, GA
10. **Special Session co-organizer at AMS Spring Central Sectional Meeting** 2022/03
Modeling and Forecasting Complex Turbulent Systems
Co-organizer: Di Qi (Purdue University). March 26–27, 2022, West Lafayette, IN
9. **Special session co-organizer at AGU 2021** 2021/12
Advances in Computational Analysis in Geophysical Processes
Co-organizer: Reza Malek-Madani (USNA), Boualem Khouider (U. Victoria), and Samuel Stechmann (UW-Madison). December 13–17, 2021, New Orleans, LA
8. **Minisymposium co-organizer at SIAM UQ** 2020/03
Optimal Control Methods for Nonlinear Filtering and Data Assimilation
Co-organizer: Prashant Mehta (UIUC). March 24–27, 2020, Garching, Germany
7. **Special Session co-organizer at AMS Fall Central Sectional Meeting** 2019/09
Classical and Geophysical Fluid Dynamics: Modeling, Reduction and Simulation
Co-organizer: Honghu Liu (Virginia Tech). September 14–15, 2019, Madison, WI
6. **Minisymposium co-organizer at Applied Inverse Problems** 2019/09
Data Assimilation and Prediction in Complex Dynamical System
Co-organizer: Xin Tong (NUS). July 08–12, 2019, Saint-Martin-dHeres, France

5. **Minisymposium co-organizer at ICIAM 2019** 2019/07
Data Assimilation, Prediction, and Uncertainty Quantification for Complex Systems
 Co-organizer: Samuel Stechmann (UW-Madison). July 15–19, 2019, Valencia, Spain
 4. **Conference co-organizer at Celebrate the 70th Birthday of A. J. Majda** 2019/03
Prediction, State Estimation, and Uncertainty Quantification in Complex Systems
 Co-organizers: Samuel Stechmann (UW-Madison), Esteban Tabak (Courant),
 Shafer Smith (Courant), John Harlim (Penn State U), March 15–17, 2019, New York, NY
 3. **Minisymposium co-organizer at SIAM UQ** 2018/04
Nonlinear Filtering and Data Assimilation in Complex Dynamical Systems
 Co-organizer: Xin Tong (NUS). April 16–19, 2018, Garden Grove, California
 2. **Workshop co-organizer** 2017/06
Workshop on Data Assimilation and Information Theory
 Co-organizer: Jin Cheng and Shuai Lu (Fudan Univ). June 07, 2017, Shanghai, China
 1. **Minisymposium co-organizer at Applied Inverse Problems** 2017/05
Parameter identification of statistical inverse problems and dynamic systems
 Co-organizer: Shuai Lu (Fudan Univ). May 29–June 02, 2017, Hangzhou, China
2. Editorial Work:
- Guest Editor: Entropy** 2021-2022
Special Issue: Info Theory, DA and Stochastics for Multiscale Nonlinear Systems
 Co-Editors: Honghu Liu (VTEch) and Evelyn Lunasin (USNA)
- Co-Guest Editor: Research in the Mathematical Sciences** 2019-2020
Special Issue: Modern Applied Mathematics and Scientific Grand Challenges
 Co-Editors: Samuel Stechmann (UW-Madison) and John Harlim(PSU)
- Co-Guest Editor: Entropy** 2018-2019
Special Issue: Information Theory and Stochastics for Multiscale Nonlinear Systems
 Co-Editors: Andrew J Majda (NYU) and Markos Katsoulakis (UMass)
3. Journal Referee: • Advances in Atmospheric Sciences, • Applied Mathematics and Computation, • Advances in Nonlinear Sciences, • Advances in Oceanography and Limnology, • Atmosphere, • Atmosphere Science Letters, • Applied Geography, • Applied Sciences, • Axioms, • Chaos: An Interdisciplinary Journal of Nonlinear Science, • Chinese Annals of Mathematics, Series B, • Communications in Mathematical Sciences, • Communications in Nonlinear Science and Numerical Simulation, • Computational and Applied Mathematics, • Energies, • Entropy, • ESAIM: Mathematical Modelling and Numerical Analysis, • Foundations of Data Science, • Frontiers of Information Technology & Electronic Engineering, • Frontiers in Marine Science, • Geophysical Research Letters, • IEEE Access, • IEEE Transactions on Neural Networks and Learning Systems, • International Journal of Plasticity, • Journal of Applied Meteorology and Climatology, • Journal of Atmospheric and Oceanic Technology, • Journal of the Atmospheric Sciences, • Journal of Climate, • Journal of Computational and Nonlinear Dynamics, • Journal of Computational Physics, • Journal of Geophysical Research – Atmospheres, • Journal of Mathematical Analysis and Applications, • Journal of Nonlinear Science, • Journal of Statistical Theory and Applications, • Journal of The Franklin Institute, • Mathematical

Biosciences and Engineering, • Mathematical Methods in the Applied Sciences, • Mathematical Modelling and Numerical Analysis, • Mathematical Problems in Engineering, • Mathematics, • Mathematics of Climate and Weather Forecasting, • Monthly Weather Review, • Nature Communications, • npj Climate and Atmospheric Science, • Nonlinear Dynamics, • Nonlinearity, • Numerical Methods for Partial Differential Equations, • Philosophical Transactions A, • Physica D: Nonlinear Phenomena, • Physics Letters A, • Physics of Fluids, • PLOS ONE, • Remote Sensing, • Research in Mathematical Sciences, • Sensors, • SIAM Journal on Applied Mathematics, • SIAM Journal on Applied Dynamical Systems, • SIAM Journal on Scientific Computing, • SIAM/ASA Journal on Uncertainty Quantification, • SIAM Undergraduate Research Online, • Scientific Reports, • Symmetry, • Tellus A: Dynamic Meteorology & Oceanography, • Water Resources Research.

4. Reviewer/Panelist for Funding Agencies: National Science Foundation (NSF), Department of Defense (DOD), American Chemical Society Petroleum Research Fund (ACS PRF), Natural Sciences and Engineering Research Council of Canada (NSERC), Ralph E Powe Junior Faculty Award Application Review at Oak Ridge Associated Universities (ORAU), MIT Sea Grant.

5. Reviewer for Mathematical Reviews (AMS)

6. Other Conference Services:

1. American Geophysical Union 2022 fall meeting

(a). Judge for the Outstanding Student Paper Award (OSPA) program

2. American Geophysical Union 2019 fall meeting

(a). Judge for the Outstanding Student Paper Award (OSPA) program

3. American Geophysical Union 2017 fall meeting

(a). Judge for the Outstanding Student Paper Award (OSPA) program

4. American Geophysical Union 2016 fall meeting

(a). Judge for the Outstanding Student Paper Award (OSPA) program

(b). Mentor of Career and Research Advice Mentorship (CRAM) program

7. PhD thesis committee for: Jason Torchinsky (UW-Madison, 2023), Yeyu Zhang (UW-Madison, 2020), Ying Li (UW-Madison, 2020), David Marsico (UW-Madison, 2020), Thomas K Edwards (UW-Madison, 2019), Yuhua Zhu (UW-Madison, 2019), Di Fang (UW-Madison, 2019), Ke Chen (UW-Madison, 2019)

Society Service

- Member, US CLIVAR Working Group on ENSO Conceptual Models

Students and Postdocs

Current students and postdocs:

Postdocs:

- Changhong Mou (2021 – current, Co-mentoring with Sam Stechmann)
- Jiuhua Hu (2021 – current, Co-mentoring with Sam Stechmann)

PhD students:

- Zhongrui Wang (2023 – current)
- Bryan Xu (2023 – current)
- Marios Andreou (2022 – current)
- Yinling Zhang (2021 – current)
- Jeffrey Covington (2019 – current)

Undergraduate students:

- Yuhan Shi (2022-Current)
- Evelyn Tollar (2023-Current)
- Marissa Zhang (2023-Current)
- Melisa Eрман (2023-Current)

Past students and postdocs:

Postdocs:

- Quanling Deng (2020 – 2021, Currently a Lecturer at Australian National University, Co-mentored with Sam Stechmann)
- Shubin Fu (2020 – 2022, Currently an Assistant Professor at Chinese Eastern Institute for Advanced Study)

PhD students:

- Yingda Li (2018 – 2021, now a research scientist at Meta/Facebook)
- Xiao Hou (2018 – 2021, now in industry)

Undergraduate students:

- Ziheng Zhang (2020-2021, now a PhD student at UT Austin)
- Diya Yang (2020, now a PhD student at U Michigan)
- Sitao Zhang (2018-2019, now a PhD student at PSU)

- Yuchen Li (2018-2019, now a PhD student at UW-Madison)

Grants

- (Current) PI, ARO, (\$387,768), 2023/07-2027/06
Stochastic Modeling and Data Assimilation of Complex Systems
- (Current) Collaborator, ARL, 2023/07-2026/06
Center for Extreme Events in Structurally Evolving Materials (CEESEM)
- (Current) Co-PI, NSF DMREF Collaborative Research, (total amount of subaward \$382,833), 2022/01-2025/12
Grain Interface Functional Design to Create Damage Resistance in Polycrystalline Metallic Materials
- (Current) PI, ONR, (\$246,554), 2021/09-2023/09
Predicting Complex Nonlinear Turbulent Systems with Uncertainty Quantification
- (Current) Co-PI, ONR MURI, (total amount of subaward \$1,760,627 shared with Samuel Stechmann at UW-Madison), 2019/06-2024/05
Mathematics and Data Science for Improved Physical Modeling and Prediction of Arctic Sea Ice
- (Past) PI, Fall Research Competition, UW-Madison, (total amount \$22,065), 2019/07-2020/06
A Conditional Gaussian Framework for High-Dimensional Complex Multiscale Non-linear Turbulent Dynamical Systems: Uncertainty Quantification, Data Assimilation, Data-Driven Model Reduction and Prediction

Awards and Fellowships

Sophomore Research Fellowships (supporting undergraduate research) <i>University of Wisconsin-Madison, 2020 Summer</i>	2020
Honored Instructor Award <i>University of Wisconsin-Madison, 2019 Spring</i>	2019
Honored Instructor Award <i>University of Wisconsin-Madison, 2018 Fall</i>	2018
2017 Editors' Citations for Excellence in Refereeing <i>American Geophysical Union (AGU) journals</i>	2018
Silver Medal of Doctor Thesis for New World Mathematics Awards 2017 <i>Awards for worldwide Chinese and Chinese descendants</i>	2018
SIAM early career travel funding	2016
Kurt O. Friedrichs prize for an outstanding dissertation in mathematics <i>Courant Institute of Mathematical Sciences, New York University</i>	2016

McCracken scholarship <i>New York University</i>	2011-2016
The excellent master dissertation of Shanghai municipality <i>Fudan University</i>	2011
Towers Perrin Fellowship	2009-2010
3rd/1st/2nd Prize <i>7th/8th/9th East China Mathematical Invitation Contest in Modeling</i>	2005-2007
1st Prize in Shanghai and National 2nd Prize <i>China Undergraduate Mathematical Contest in Modeling (CUMCM)</i>	2006

Teaching Experience

Instructor <i>Stochastic Computational Method (Math 717)</i> Department of Mathematics, University of Wisconsin-Madison	Fall 2022
Instructor <i>Stochastic Computational Method (Math 833)</i> Department of Mathematics, University of Wisconsin-Madison	Fall 2021
Instructor <i>Mathematical Methods in Data Science (MATH 535)</i> Department of Mathematics, University of Wisconsin-Madison	Fall 2021
Instructor <i>Calculus and Analytic Geometry II (MATH 222)</i> Department of Mathematics, University of Wisconsin-Madison	Spring 2021
Instructor <i>Topics in Applied Mathematics (MATH 801)</i> Department of Mathematics, University of Wisconsin-Madison	Fall 2020
Instructor <i>Topics in Applied Mathematics (MATH 801)</i> Department of Mathematics, University of Wisconsin-Madison	Spring 2020
Instructor <i>Topics in Applied Mathematics (MATH 801)</i> Department of Mathematics, University of Wisconsin-Madison	Spring 2019
Instructor <i>Calculus - Functions of Several Variables (MATH 234)</i> Department of Mathematics, University of Wisconsin-Madison	Fall 2018
Instructor <i>Methods of Computational Mathematics I (MATH 714)</i> Department of Mathematics, University of Wisconsin-Madison	Fall 2018
Co-Instructor <i>Simple Dynamical Stochastic Models Capturing the Observed Diversity of the El Niño</i> Courant Institute, New York University	Fall 2017

Co-Instructor <i>Quantifying Uncertainty in Complex Turbulent Systems</i> Courant Institute, New York University	Fall 2015
Co-Instructor <i>Filtering Turbulent Signals in Complex Systems</i> Courant Institute, New York University	Fall 2014
Instructor <i>Introduction to Uncertainty Quantification for Complex Nonlinear Systems</i> Mini course series at Fudan University	Winter 2013
Co-Instructor <i>Quantifying Uncertainty in Complex Turbulent Systems</i> Courant Institute, New York University	Fall 2013

Outreach

1. I am involved in Madison Experimental Mathematics Lab (MXM Lab) to enhance and support undergraduate research within the Department of Mathematics and the University of Wisconsin, and in line with the Wisconsin Idea, to support departmental efforts to engage local, state and national communities through outreach.
2. I participate in the Wisconsin Science and Computing Emerging Research Stars (WISCERS) program, which is an undergraduate mentorship program that specifically helps support students from historically underrepresented groups in computing.
3. I was the lead instructor in the “UW Advance Data Analytics and Informatics” program, which was a three-week opportunity for undergraduate students to get a glimpse into the academic programs at UW-Madison from January 11 to February 5, 2021, and from July 12 to July 30, 2021. I gave several one-hour talks and interacted with students.
4. I am the leading author of two articles in Elsevier’s Reference Module in Earth Systems and Environmental Sciences. These articles aim at explaining scientific concepts to the public and general audience using plain language. The contents belong to my research — the interdisciplinary area between applied mathematics and atmosphere and ocean science.
 - El Niño and the Southern Oscillation: Theory, with Sulian Thual and Malte F Stuecker.
 - El Niño and the Southern Oscillation: Observation, with Sulian Thual and Shineng Hu.
5. I mentor undergrad students for research during the semesters and in summer time every year. I also support undergrad student to present the research work with me at UW-Madison undergrad symposium (and other related conferences).

University- and Department-Level Services

- 2022-2023: Graduate Advising; Alternate Senator; Applied Math Masters; VISP/MA Program.
- 2021-2022: Graduate Advising; Alternate Senator; Graduate Program; VISP/MA Program; UW Advance Data Analytics and Informatics (University-level).
- 2020-2021: Graduate Advising; Continuing MA Advisors; VISP/MA Program Committee; Doctoral Exams-Computational Math; UW Advance Data Analytics and Informatics (University-level).
- 2019-2020: Doctoral Exams-Computational Math, Graduate Admissions; VISP/MA Program.
- 2018-2019: New Institute; Expansion; Graduate Admissions; VISP/MA Program.

Talks

Invited talks

1. Data Assimilation: Dynamical Interpolation, State Estimation, and Model Identification, Computational Mathematics, Laboratory for Applied Mathematics, Numerical Software, and Statistics (LANS) at Argonne National Laboratory, June 21, 2023.
2. Data Assimilation: Dynamical Interpolation, State Estimation, and Model Identification, Computational Mathematics, Science and Engineering (CMSE) Colloquium Michigan State University, March 27, 2023.
3. A Physics-Informed Data-Driven Algorithm for Ensemble Forecast of Complex Turbulent Systems, CAM Colloquium, University of Chicago, November 3, 2022.
4. Combining Stochastic Parameterized Reduced Order Models with Machine Learning for Data Assimilation and Uncertainty Quantification with Partial Observations, Machine Learning for Climate and Weather Applications, IMSI Chicago, October 31 - November 4, 2022.
5. Combining a Stochastic Parameterized Filter with Machine Learning to Assimilate Complex Turbulent Systems Using Partial Observations, 2022 Fall Western Sectional Meeting, October 22-23, 2022, University of Utah, Salt Lake City, UT.
6. A Physics-Informed Data-Driven Algorithm for Ensemble Forecast of Complex Turbulent Systems, SIAM Conference on Mathematics of Planet Earth (MPE22), July 13-15, 2022, Pittsburgh, PA.
7. BAMCAFE: A Bayesian Machine Learning Advanced Forecast Ensemble Method for Complex Turbulent Systems with Partial Observations, SIAM Annual Meeting, July 11-15, 2022, Pittsburgh, PA.
8. A Physics-Informed Data-Driven Statistical Reduced Order Model for Ensemble Forecast of Complex Turbulent Systems, Accurate ROMs for Industrial Applications at Virginia Tech (ARIA@VT), Virginia Tech, July 6-8, 2022.
9. A Physics-Informed Data-Driven Algorithm for Ensemble Forecast of Complex Turbulent Systems, One World Mathematics of Climate Seminar, June 7, 2022, Online.

10. A Physics-Informed Data-Driven Algorithm for Ensemble Forecast of Complex Turbulent Systems, AMS Spring Western Sectional Meeting, May 14 – 15, 2022, Online.
11. A Physics-Informed Data-Driven Algorithm for Ensemble Forecast of Complex Turbulent Systems, SIAM UQ conference, April 12 - 15, 2022, Atlanta, GA.
12. BAMCAFE: A Bayesian Machine Learning Advanced Forecast Ensemble Method for Complex Turbulent Systems with Partial Observations, AMS Spring Central Sectional Meeting, Apr. 2 – 3, 2022, Purdue University, IN.
13. A Simple Multiscale Stochastic Model for Large-Scale ENSO Complexity and Its Predictability Using Information Theory, Atmosphere, Oceans, Climate Dynamics Seminar, March 3, 2022, Yale University.
14. A Stochastic Multiscale Model for El Niño Complexity, 102nd AMS Annual Meeting, Feb. 24 – Mar. 4, 2022, Honolulu, HI.
15. Conditional Gaussian Nonlinear System: a Fast Preconditioner and a Cheap Surrogate Model For Complex Nonlinear Systems, Jan 25, 2022, Numerical Analysis Seminar, NCSU (Remote Talk).
16. Can Short and Partial Observations Reduce Model Error and Facilitate Machine Learning Prediction for Extreme Events? May 23-27, 2021, SIAM Conference on Applications of Dynamical Systems, SIAM DS21 (Remote talk).
17. Using nonlinear data assimilation to improve the machine learning training and forecasts. Geophysical/Astrophysical Fluid Dynamics Seminar, University of Colorado Boulder, April 6, 2021 (Remote talk).
18. A Simple Multi-region and Multiscale Stochastic Model for ENSO Diversity and Its Machine Learning Forecast, 2021, March 29, Applied & Computational Math seminar, BiCMR (Remote talk).
19. An Efficient Conditional Sampling Algorithm for Nonlinear Stochastic Model Trajectories with Applications to Machine Learning Prediction using Short Observations, March 1-5, 2021, SIAM Conference on Computational Science and Engineering (SIAM CSE 21; Remote talk).
20. Can Short and Partial Observations Reduce Model Error and Facilitate Machine Learning Prediction for Machine Learning Prediction? Dec 7-11, 2020, AGU Fall Meeting (Remote talk).
21. Efficient Nonlinear Optimal Smoothing and Sampling Algorithms for Complex Turbulent Nonlinear Dynamical Systems with Partial Observations, June 30, 2020, SIAM MDS Conference (Remote talk)
22. Efficient Nonlinear Optimal Smoothing and Sampling Algorithms for Complex Turbulent Nonlinear Dynamical Systems with Partial Observations, March 2, 2020, Mathematics Seminar, Southern University of Science and Technology (Remote talk)

23. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, January 06, 2019, Mathematics Seminar, Fudan University
24. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, April 10, 2019, Data Science Seminar, Johns Hopkins University
25. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, April 5, 2019, MIT seminar, MIT
26. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, April 4, 2019, Brandeis-Harvard-MIT-Northeastern Joint Mathematics Colloquium, Northeastern University
27. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, March 15, 2019, A Conference to Celebrate the 70th Birthday of Professor Andrew Majda, New York University
28. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, February 14, 2019, Computational and Applied Mathematics Colloquium, University of Chicago
29. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, November 9, 2018, Research Seminars: Applied and Computational Mathematics, Tulane University.
30. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, October 24, 2018, Systems, Information, Learning and Optimization (SILO) Seminar, University of Wisconsin-Madison.
31. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, October 10, 2018, Department Seminar at Statistics Department, University of Wisconsin-Madison.
32. A Simple Dynamical Model for El Niño with Stochastic Wind Bursts, September 25, 2018, Applied Math Seminar, University of Wisconsin-Madison.
33. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, SIAM conference on Uncertainty Quantification, April 16-19, 2018, Garden Grove, CA.
34. A Conditional Gaussian Framework for Data Assimilation and Prediction of Nonlinear Turbulent Dynamical Systems, April 5, 2018, U.S. Naval Academy.
35. A Conditional Gaussian Framework for Uncertainty Quantification, Data Assimilation and Predicting Complex Nonlinear Dynamical Systems, February 26, 2018, Colloquium talk at Courant Institute of Mathematical Sciences, New York University.

36. A Conditional Gaussian Framework for Uncertainty Quantification, Data Assimilation and Predicting Complex Nonlinear Dynamical Systems, February 5, 2018, Colloquium talk at Caltech.
37. A Conditional Gaussian Framework for Uncertainty Quantification, Data Assimilation and Predicting Complex Nonlinear Dynamical Systems, January 29, 2018, Colloquium talk at Florida State University.
38. A Conditional Gaussian Framework for Uncertainty Quantification, Data Assimilation and Predicting Complex Nonlinear Dynamical Systems, December 19, 2017, Shanghai Math Center, China.
39. Efficient Statistically Accurate Algorithms for the Fokker-Planck Equation in Large Dimensions, 2017 AGU Fall Meeting, December 11-15, New Orleans, LA.
40. A Conditional Gaussian Framework for Uncertainty Quantification, Data Assimilation and Predicting Complex Nonlinear Dynamical Systems, December 8, 2017, Colloquium talk at University of Wisconsin-Madison.
41. A Conditional Gaussian Framework for Uncertainty Quantification, Data Assimilation and Predicting Complex Nonlinear Dynamical Systems, November 29, 2017, Colloquium talk at Bath University, UK.
42. A conditional Gaussian framework for filtering and predicting complex nonlinear dynamical systems, Nonlinear and Stochastic Problems in Atmospheric and Oceanic Prediction, Meetings at Banff International Research Station 2017, November 19-24, Banff, Canada.
43. A conditional Gaussian framework for filtering and predicting complex nonlinear dynamical systems, SIAM Annual Meeting 2017, July 9 – July 15, Pittsburgh, PA.
44. Simple stochastic dynamical models capturing the diversity of El Niño Southern Oscillation, Conference on Classical and Geophysical Fluid Dynamics: Modeling, Reduction and Simulation, Virginia Tech, June 26 – 28, 2017.
45. A Simple Dynamical Model for El Niño with Wind Bursts and the Mechanisms of the 2014-2016 Delayed Super El Niño, Frontier of Applied and Computational Mathematics, New Jersey Institute of Technology, June 24-25, 2017.
46. A conditional Gaussian framework for filtering and predicting complex nonlinear dynamical systems, Applied Inverse Problems 2017, May 29 – June 2, Hangzhou, China.
47. Prediction of the Indian Monsoon Precipitation, SIAM Conference on Applications of Dynamical Systems (DS17), Snowbird, Utah, May 21 – 25, 2017.
48. Simple stochastic dynamical models capturing the diversity of El Niño Southern Oscillation, CAOS Colloquium, New York University, Mar. 1, 2017.
49. Simple stochastic dynamical models capturing the diversity of El Niño Southern Oscillation, Applied PDE seminar (joint with GFDI seminar), Florida State University, Feb. 24, 2017.

50. An Applied Math Perspective on Climate Science, Turbulence, and Other Complex Systems, Shanghai Jiaotong University, Jan. 04, 2017.
51. An Applied Math Perspective on Climate Science, Turbulence, and Other Complex Systems, Fudan-Guanghua International Forum for Young Scholars, Fudan University, Dec. 29, 2016.
52. Simple stochastic dynamical models capturing the diversity of El Niño Southern Oscillation, Workshop on data assimilation and inverse problems, Shanghai University of Finance and Economics, Dec. 23, 2016.
53. A conditional Gaussian framework for filtering and predicting complex turbulent systems, Seminar on Data assimilation and filtering dynamics systems, Fudan University, Dec. 19, 2016.
54. A simple model for the El Niño-Southern Oscillation, 2nd NYU Postdoc Interdisciplinary Symposium, New York, Nov. 14, 2016.
55. A simple stochastic dynamical model capturing the diversity of El Niño Southern Oscillation, 2016 MURI workshop, New York University, Oct. 21, 2016.
56. Filtering Compressible and Incompressible Turbulent Flows with Noisy Lagrangian Tracers, SIAM UQ conference, Lausanne, Apr. 7, 2016.
57. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, Department of Mathematical Sciences, New Jersey Institute of Technology, Mar. 21, 2016.
58. Conditional Gaussian Filter for Nonlinear Dynamics, 2016 MURI workshop, New York University, Jan 30, 2016.
59. Physics-Constrained Low-Order Prediction Model for the MJO and Monsoon, 2016 MURI workshop, New York University, Jan. 30, 2016.
60. Filtering Stochastic Skeleton Model for the Madden-Julian oscillation (MJO), 2016 MURI workshop, New York University, Jan. 29, 2016.
61. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, Columbia University, Oct. 21, 2015.
62. Predicting the Madden-Julian oscillation (MJO) and boreal summer intraseasonal oscillation (BSISO) through low-order nonlinear stochastic models, Mathematics of Geophysical Flows and Turbulence, Aug. 17 – 19, 2015, Shanghai, China.
63. Filtering turbulent fluid flows with noisy Lagrangian tracers, Mathematics of Geophysical Flows and Turbulence, Shanghai, China, Aug. 17 – 19, 2015.
64. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, International Council for Industrial and Applied Mathematics, Beijing, China, Aug. 10 – 14, 2015.

65. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, Stochasticity and Organization of Tropical Convection, Banff, Canada, Apr. 27, 2015.
66. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, University College London, UK, Jan. 16, 2015.
67. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, Lishui University, China, Dec. 25, 2014.
68. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, Zhejiang University, China, Dec. 22, 2014.
69. Introduction to Stochastic Models for Turbulence and Filtering with Instability and Model Error, Short Course in High Dimensional Filtering, University of Warwick, UK, June 29, 2014.
70. An MCMC Algorithm for Parameter Estimation of Signals with Hidden Intermittent Instability, SIAM Conference on UQ, Savannah, Georgia, Mar. 31, 2014.
71. An MCMC Algorithm for Parameter Estimation of Signals with Hidden Intermittent Instability, 2014 MURI workshop, New York University, Jan. 21, 2014.
72. Filtering the Turbulent Signals with Gaussian and non-Gaussian Filters, 2013 Interdisciplinary Summer School: Data Assimilation in Geosciences, University of Maryland College Park, June. 13, 2013.
73. Non-Gaussian Test Models for Prediction and Filtering with Model Errors, Invited talk in Fudan University, Shanghai, China, Dec. 27, 2012.
74. Asymptotic analysis of the differences between the Stokes-Darcy system with different interface conditions and the Stokes-Brinkman system, Doctorial Forum of Mathematics between Fudan and Kyoto Universities, Fudan University, Shanghai, China, Nov. 1-5, 2010.
75. Modeling, analysis and simulation of fluid flows in karst aquifer, Youth academic forum of Department of Mechanics and Engineering Science, Fudan University, Shanghai, China, May. 25, 2010.
76. Numerical simulation of interstitial fluid based on a new view of the Starling's hypothesis of capillary wall, Thirteenth National", Boundary value problems, integral equations and related problems" academic conference, Zhongshan University, Guangzhou, China, Jan. 4-6, 2008.

Postdoc/graduate seminar talks

77. Predicting the Cloud Patterns for the Madden-Julian Oscillation, Courant Postdoc and Graduate Student Seminar, Courant Institute of Mathematical Sciences, New York University, Nov. 18, 2016.

78. An introduction to the El Niño Southern Oscillation, CAOS Tuesday Lunch Seminar, Courant Institute of Mathematical Sciences, New York University, Oct. 18, 2016.
79. Filtering Nonlinear Turbulent Dynamical Systems through Conditional Gaussian Statistics, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Feb. 05, 2016.
80. Filtering the Stochastic Skeleton Model for the Madden-Julian Oscillation, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Sep. 11, 2015.
81. Predicting the Real-time Multivariate Index for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Feb. 13, 2015.
82. Introduction to model selection, CAOS Monday Lunch Seminar, Feb. 9, 2015.
83. Stochastic toolkits for uncertainty quantification, CAOS Monday Lunch Seminar, Nov. 17, 2014.
84. Predicting the Cloud Patterns for the Madden-Julian Oscillation through a Low-Order Nonlinear Stochastic Model, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Sep. 26, 2014.
85. Information Barriers for Noisy Lagrangian Tracers in Filtering Random Incompressible Flows, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Feb. 28, 2014.
86. An MCMC Algorithm for Parameter Estimation of Signals with Hidden Intermittent Instability, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Dec. 06, 2013.
87. Filtering the Turbulent Signals with Gaussian and non-Gaussian Filters, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Feb. 22, 2013.
88. Non-Gaussian Test Models for Prediction and State Estimation with Model Errors, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Sep. 21, 2012.
89. Gaussian and Non-Gaussian Closures with Model Error for Simple Model with Complex Features, CAOS Student Seminar, Courant Institute of Mathematical Sciences, New York University, Apr. 20, 2012.
90. Regularized Averaged Clustering Method, CAOS Monday Lunch Seminar, Courant Institute of Mathematical Sciences, New York University, Feb. 6, 2012.

Posters

91. A Multiscale Model for El Nino Complexity, AGU Fall 2022 Meeting, Dec. 12 – 16, Chicago, IL.

92. A Physics-Informed Data-Driven Algorithm for Ensemble Forecast of Complex Turbulent Systems, AGU Fall 2022 Meeting, Dec. 12 – 16, Chicago, IL.
93. A Stochastic Multiscale Model for El Niño Complexity, 102nd AMS Annual Meeting, Jan. 23 – 27, 2022, Houston, TX.
94. A Stochastic Multiscale Model for El Niño Complexity, AGU Fall 2021 Meeting, Dec. 13 – 17, New Orleans, LA.
95. BAMCAFE: A Bayesian Machine Learning Advanced Forecast Ensemble Method for Complex Turbulent Systems with Partial Observations, AGU Fall 2021 Meeting, Dec. 13 – 17, New Orleans, LA.
96. A simple stochastic dynamical model capturing the statistical diversity of El Niño Southern Oscillation, AGU Fall 2019 Meeting, Dec. 9 – 12, 2019, San Francisco.
97. Predicting Extreme Events in Complex Nonlinear Dynamical Systems using Partial Observations and Short Training Data, with Applications to Monsoon Intraseasonal Variability, AGU Fall 2019 Meeting, Dec. 9 – 12, 2019, San Francisco.
98. Simple Dynamical Models Capturing the Key Features of the Central Pacific El Niño, AGU Fall 2016 Meeting, Dec. 12 – 16, 2016, San Francisco.
99. Filtering Nonlinear Turbulent Dynamical Systems through Conditional Gaussian Statistics, Frontiers in Applied & Computational Mathematics, June 3–4, 2016, New Jersey Institute of Technology, Newark, NJ.
100. Filtering Nonlinear Turbulent Dynamical Systems through Conditional Gaussian Statistics, Uncertainty Quantification for Multiscale Stochastic Systems and Applications, Jan. 19 – 22, 2016, UCLA.
